A WORD ABOUT CHEAP ROSES

The rose growing section of Texas will produce about fifteen million rose plants this season. Of this number about one-fourth will grade No. 1 plants; the remaining three-fourths run No. 1½, No. 2, No. 3 and culls. You no doubt have been bombarded with price lists on Texas roses, offering rose plants advertised as No. 1 Two-Year Field Grown roses at 6c, 7c and 8c each. When you send your order to dealers offering these low prices, just remember you will get no more than you pay for. Good No. 1 rose plants cannot be sold for such a price; don't expect it.

SPECIAL BARGAINS

In presenting this SPECIAL BARGAIN LIST, we sincerely believe the items listed are real bargains, quality considered. It costs lots of money to prepare beds, plant, fertilize and properly care for nursery stock, and we feel that we can serve our customer's best interest, as well as our own, by selling only high quality stock, and refusing to offer trash, at any price.

CONDITIONS OF SALE

(1) These special bargains are sold F.O.B. here. Customer pays carrying charges, except on seed.
(2) No discount will be allowed on these special bargains, or on seed.

(3) We guarantee all "Special Bargains," including flower seed, to be true to name and description, but do not guarantee the crop, nor any other guarantee on this stock.

EVERBEARING TEXAS FIG

This is the most wonderful fig we have ever seen. The real truth about this fig sounds like a "fish story." It will stand more cold than any other variety: even when it freezes back it will come back the following summer and produce a good crop of figs; many as large as hen eggs, and we actually mean that many of the figs are that large. We have seen young plants, put out as cuttings in April bear 18 to 24 figs within 90 days after planting. One grower, near Arlington, Texas, sold \$900.00 worth of figs from one acre during one summer. Without exaggeration, it really is a wonder.
